### **Movius and Neutral Tandem to Provide Hosted Messaging Applications to Carriers**

*New Hosted Services Delivery Platform Reduces Carriers' Capital Investment and Accelerates Application Delivery Time to Market*

**ATLANTA and CHICAGO – September 1, 2009** – Movius Interactive Corporation, a global leader in messaging, collaboration and mobile media solutions, and Neutral Tandem, Inc. (Nasdaq:TNDM), a leading provider of tandem interconnection services, today announced a strategic joint offering to enable telecommunications carriers to reduce the risk and accelerate the speed of delivering new interactive messaging applications to market.

Under the terms of the new arrangement, Movius and Neutral Tandem will provide messaging services on a hosted basis to wireless, wireline, cable and broadband operators. Movius' advanced suite of messaging, collaboration and interactive mobile media applications will be hosted in Neutral Tandem's next-generation, IP compatible, interconnection network. With the new Movius/Neutral Tandem Hosted Service Delivery Platform, carriers can offer full-featured messaging solutions without the upfront capital normally required.

"Today's carriers are faced with increasing pressure to quickly deliver new applications to maintain a competitive advantage, yet the initial capital and operational expense required to implement them can cause the rollout to be delayed or even cancelled," said Oscar Rodriguez, CEO at Movius. "By partnering with Neutral Tandem, we can now enable carriers to accelerate their time to market while minimizing their initial expense for launching new applications such as Visual Voicemail and VoiceSMS. Neutral Tandem's existing network interconnections with the major competitive carriers across the country serve as a logical platform from which to offer these applications in a convenient and redundant hosted environment."

"In today's economic environment, carriers are looking for ways to control their costs," said Surendra Saboo, Chief Operating Officer, Neutral Tandem. "Together with Movius, we have built an advanced platform for the delivery of a full-featured messaging suite that minimizes the risk traditionally associated with the deployment of new services and eliminates the management of ongoing software upgrades and patches."

The solution will be hosted in Neutral Tandem's state-of-the-art redundant hosting environment which offers battery and generator backup power and dual entrance fiber facilities. To enhance redundancy, the service can also interconnect with the carrier using diverse network facilities.

### **Neutral Tandem Cautions Concerning Forward Looking Statements**

This press release contains forward-looking statements that involve substantial risks and uncertainties. All statements, other than statements of historical fact, included in this press release regarding the Movius/Neutral Tandem hosted messaging application as well as Neutral Tandem's strategy, future operations, future service offerings, future financial position, future revenues, projected costs, prospects, plans and objectives of management are forward-looking statements. The words "anticipates," "believes," "expects," "estimates," "projects," "plans," "intends," "may," "will," "would," and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. Neutral Tandem may not actually achieve the plans, intentions or expectations disclosed in its forward-looking statements. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements Neutral Tandem makes. Factors that might cause such differences include, but are not limited to: the impact of current and future regulation affecting the telecommunications industry; the effects of competition; the impact of current or future litigation; the ability to attract,

develop and retain executives and other qualified employees; the ability to obtain and protect intellectual property rights; changes in general economic or market conditions; technological developments; natural or man-made disasters; and other important factors included in Neutral Tandem's reports filed with the Securities and Exchange Commission, particularly in the "Risk Factors" section of Neutral Tandem's Annual Report on Form 10-K for the period ended December 31, 2008 and Quarterly Report on Form 10Q for the period ended June 30, 2009. Neutral Tandem does not assume any obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.

### **About Neutral Tandem, Inc.**

Headquartered in Chicago, Neutral Tandem, Inc. is a leading provider of tandem interconnection services to wireless, wireline, cable and broadband telephony companies. Founded in 2003, Neutral Tandem facilitates inter-carrier communications with a cost-effective alternative to the Incumbent Local Exchange Carrier (ILEC) network. Neutral Tandem's solutions build redundancy, security and operational efficiencies into the nation's telecommunications infrastructure. As of June 30, 2009, Neutral Tandem was capable of connecting approximately 443 million telephone numbers assigned to carriers. Telephone numbers assigned to a carrier may not necessarily be assigned to, and in use by, an end user. Please visit Neutral Tandem's website at: [www.neutraltandem.com](http://www.neutraltandem.com).
