

Movius Interactive Corporation

PRESS RELEASE

VISUAL VOICEMAIL EXPERIENCE AVAILABLE ACROSS PUERTO RICO THANKS TO MOVIUS AND OPEN MOBILE

Atlanta, GA, U.S.A. - June 30, 2009 - Movius Interactive Corporation, a global leader in messaging, collaboration and mobile media solutions, today announced that its innovative clientless visual voicemail application, MessageMe Plus™, will be made available to all Open Mobile customers.

Open Mobile, a mobile telephone service provider based in Puerto Rico, will be offering this easy-to-use visual voicemail experience to its subscribers, enabling users to receive voicemail information and access on any mobile device utilizing SMS.

MessageMe Plus enables voicemail information to be pushed to the user's mobile device and provides message details, including the name of the sender, the sender's number, the time the message was left and the length of the message. Open Mobile subscribers can review all their messages in one unified inbox, their SMS inbox, and select the message they want to listen to. With just one click, they can listen to the message they want.

"With MessageMe Plus, users with any model mobile phone can now have an enhanced voicemail experience without the cost of an expensive handset or smartphone," says Keith Bhatia, Senior Vice President of Worldwide Sales at Movius Interactive Corporation. "As carriers are looking to increase their customer base, applications that enable providers to attract new customers, encourage customer loyalty and help reduce churn are essential. We are delighted that Open Mobile has chosen MessageMe Plus to do this."

Frank Bell, President and COO at Open Mobile, explains, "Our customers in Puerto Rico are very progressive and always interested in new and innovative applications. We strive to provide them with the best service possible, to enhance their wireless mobile experiences and to make their lives a bit easier. MessageMe Plus provides a superior voice mail experience which we believe our customers will embrace."

- ENDS -
